To our valued customers using Myton Grinder Model MAG-40

Since 1st July 2006 we have supplied our power tools and machine tools as RoHS compliant product. We have, however, found that the Grip Tube of the model MAG-40 contains lead that is slightly above levels as permissible in the RoHS directive. We can, though, assure you that this will not affect any function of the tool.

The tools and Grip Tubes applicable are as follows:

1. Model MAG-40 produced from July 2006 to June 2010
2. Grip Tubes for repair produced from July 2006 to August 2013

We sincerely apologize for any inconvenience that this may cause you.
