

NOISE DATA Model No. KDR-1301

Measuring Conditions : Air Pressure : 0.6 Mpa (Pe) Static air pressure
 Air Hose Length : 3m, 6.5mm inside diameter

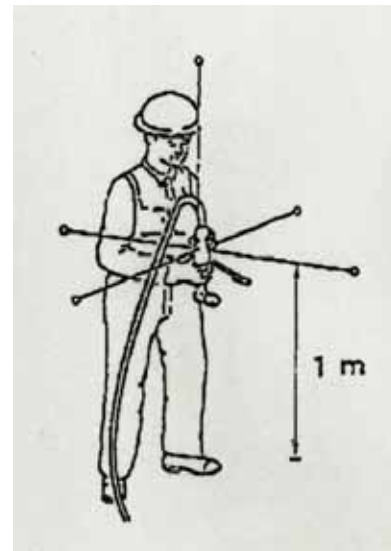

Noise A-Characteristics : Dynamic characteristics is "FAST".
 Background Noise : 50 dB (A)

Measured at the position 1m height from the floor.

We fixed the microphone at the position 45 degree toward exhaust air and 1m distance in 5 directions toward the unit for the measurement.

Used noise level meter (NL-01A) is from Rion Co., Ltd.

Model No.	Noise Level Value No-loading dB (A)
KDR-1301	82

Remarks :

1. As to the noise measurement, ISO measuring standard has been constituted yet. This measurement and data has been carried out according to the draft of ISO standard partially. The value may be differed in case the standard is constituted and re-measurement is carried out in future.

2. Noise level value may be changed due to product modification.
